

ThermWise Builder Rebates Builder Participation Agreement

Welcome to the Questar Gas ThermWise Builder Rebates Program. This is an agreement to become a builder participant in the program. The program offers rebates for ENERGY STAR® certified homes and high-efficiency furnaces and water heaters to builders of newly constructed single-family homes or dwellings of up to four units within Questar Gas's Utah service area.

Terms and Conditions

Rebate availability

Questar Gas's ThermWise Builder Rebates Program has been approved by the Public Service Commission of Utah and may be subject to change or modification at any time. Builders of newly constructed homes are eligible to receive rebates for the purchase and installation of high-efficiency equipment and/or for building ENERGY STAR® certified homes. New equipment purchased and installed, and new homes certified as ENERGY STAR, on or after January 1, 2007, are eligible. Applications must include all information requested. Failure to provide this information may result in the delay or denial of the rebate.

Rebate qualification

Separately metered newly constructed residences, in Questar Gas's Utah service area and billed on a General Service (GS) rate schedule are eligible to participate in the ThermWise Builder Rebates Program. A qualifying residence is a single-family home or individually-metered dwelling of up to four units per building.

Measure	Specification	Questar Gas Rebate
High-Efficiency Storage Gas Water Heater	EF 0.63 or greater	\$50
Tankless Gas Water Heater	EF 0.80 or greater	\$300
High-Efficiency Gas Furnace	AFUE Rating of 90% or greater	\$300
ENERGY STAR Whole House Certification	HERS Index of 85 or lower	\$500

Qualifying equipment models may be found on ThermWise.com/builders.html or by calling 1-866-699-6034.

For each furnace and/or water heater rebate, required supporting documentation includes: an itemized receipt (with date of purchase, description of equipment, manufacturer, and model number) and serial number.

For each ENERGY STAR whole-house rebate, a third-party home energy rater must provide field verification of home performance and supporting documentation, including: 1) ENERGY STAR New Home Certificate, and 2) ENERGY STAR Home Verification Summary (REM/Rate report). If applying for the ENERGY STAR whole-house and furnace(s) and/or water heater(s) rebates, additional ENERGY STAR Home Verification Summary modeling report(s) must be provided to demonstrate ENERGY STAR whole-house performance was achieved without consideration of the high-efficiency furnace(s) and/or water heater(s).

Application details

Builder must complete a separate application for each home. Applications are subject to verification by Questar Gas. If your application is selected for verification, it will not be processed until the verification process is satisfactorily completed. Builders will be paid the rebates listed above after all completed documentation for the measure listed above are received by Questar Gas.

Questar Gas issues rebates in the form of checks, not utility-bill credits. Questar Gas is not responsible if your supplier provides inaccurate information about the amount and/or conditions of the actual rebate and Questar Gas will not pay rebates for equipment that is mislabeled or misrepresented by dealers regarding rebate qualifications.

Rebate limitations & limitation of damages

The following requirements apply to rebate application payments for the program:

Rebates are limited to one ENERGY STAR whole house certification incentive and two (2) rebates each for the other three available measures per qualifying newly constructed, separately-metered dwelling unit (as further described above under the rebate qualification section) and will be tracked by builder, premises number and address.

Qualifying packages and/or measures receiving rebates under the program may not receive equipment purchase and installation incentives under any other Questar Gas program.

New residences at an address with an active Questar Gas Service Line Agreement are eligible.

Payment of the rebate by Questar Gas does not warrant the performance of qualifying/installed equipment or home and does not warrant that the qualifying/installed equipment will deliver any specified amount of energy or cost savings. The customer shall independently evaluate any information related to the qualifying equipment. Neither Questar Gas, its parent company, affiliates, subsidiaries, officers, employees, nor its contractors make any warranty, expressed or implied, or assume any legal liability or responsibility for the accuracy, completeness or usefulness of any information, estimated savings, benefits, apparatus, products or processes disclosed, or represent that its use would not infringe on privately owned rights. Reference to any specific commercial project, processes, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by Questar Gas, its parent company, affiliates, subsidiaries, officers, employees, or its contractors.
