

# ThermWise<sup>SM</sup> for Business Customers

## Save Gas and Money with Questar's ThermWise<sup>SM</sup> Programs

### WHAT IS THERMWISE?

Energy efficient buildings are great for business and the environment. At Questar Gas, we want to make it even more beneficial to save natural gas. Our rebate programs for business customers offer a variety of ways to become both more energy efficient and save money. Whether you are installing new high-efficiency equipment, performing a system upgrade or commissioning equipment, the ThermWise programs can help.

### BENEFITS OF PARTICIPATION

- Shorten installation payback periods with rebates
- Increase company productivity and profitability by improving energy efficiency and reducing energy costs
- Decrease maintenance time and costs with new, more efficient equipment
- Improve public image by installing natural gas equipment with environmental benefits

### WHICH PROGRAM IS RIGHT FOR ME?

#### BUSINESS REBATES

Available for:

- Food service equipment
- Laundry equipment
- HVAC applications
- Water heating
- Insulation & windows

#### BUSINESS CUSTOM REBATES

Available for:

- Heat recovery installations
- Solar assisted gas water heating
- Retro-commissioning projects
- Control system upgrades
- Process equipment insulation

#### MULTIFAMILY REBATES

Available for:

- Space heating applications
- Hot water heating
- Laundry equipment
- Insulation & windows

### HOW TO PARTICIPATE

To participate in a ThermWise business program, a customer must be served by Questar Gas in Utah and parts of Idaho, and install a qualifying measure in a separately metered commercial facility on a Commercial GS rate schedule (Multifamily Rebates may differ). Qualifying measures include those that target cost-effective natural gas savings, including retrofits of existing systems and first time installations where the system's efficiency exceeds International Conservation Code 2006 or standard industry practice. Please reference the program manual or website for specific eligibility requirements and rebate amounts.
