

Questar Gas® provides rebates for many types of energy-efficient technologies and equipment for the food service industry that can save money.

Did you know...?

Restaurants per square foot, consume nearly three times the energy of the average commercial building. Long hours of operation, specialized equipment and sheer demand make up much of this substantial consumption.

The ThermWise® Business Rebates Program rewards you for purchasing energy-efficient equipment and reducing energy usage in your business.

Business Rebates are only available for Questar Gas® Commercial General Service (GS) Business Customers.

For more information about ThermWise® Business Rebates, eligibility requirements, rebate levels or other general inquiries, please visit ThermWise.com, or call our Customer Service Hotline at 800-567-3460.

If you conserve, you can save.

Rebates for Qualifying Equipment

Save money and conserve energy by installing the following energy saving measures.

- ENERGY STAR® Commercial Gas Fryers
- High-Efficiency Gas Convection Ovens
- ENERGY STAR Gas Steam Cookers
- High-Efficiency Gas Griddles
- High-Efficiency Combination Ovens
- Low-Flow, Pre-Rinse Spray Valves

ENERGY STAR® Commercial Gas Fryer

Using advanced burner and heat exchanger designs can significantly reduce annual energy costs. Rebates are available* for ENERGY STAR rated commercial gas fryers.

Rebate

\$500/vat

High-Efficiency Gas Convection Ovens

Infrared burners, combustion gas recirculation systems and solid state controls result in lower energy costs. Rebates are available* for installations of ENERGY STAR rated high-efficiency natural gas convection ovens.

Rebate

\$500/cavity

ENERGY STAR Gas Steam Cooker

Qualified commercial steam cookers offer shorter cook times, higher production rates and reduced heat loss due to better insulation and more efficient steam delivery. Rebates are available for ENERGY STAR rated gas steam cookers. Energy rates are specified for 3-, 4-, 5-, and 6- pan sizes.

Rebate

\$1,000/unit

High-Efficiency Gas Griddle

High-efficiency natural gas griddles reduce annual energy costs through improved cooking efficiency and pre-heat/idle energy consumption. Rebates are available* for ENERGY STAR rated high-efficiency gas griddles.

Rebate

\$300/unit

High-Efficiency Gas Combination Oven

High-Efficiency gas combination ovens provide annual savings of up to 20 percent over standard efficiency units. Rebates are available* for high-efficiency natural gas combination ovens with an efficiency rating greater than or equal to 40% (tested in accordance with ASTM F1639).

Rebate

\$1,000/unit

Low-Flow, Pre-Rinse Spray Valves**

Low-flow, pre-rinse spray valves save water. Reduced water use correlates to natural gas savings by reducing the amount of water to be heated. Rebates are available for the replacement of older, less-efficient models with low-flow, pre-rinse spray valves using 1.6 gpm or less.

Rebate

\$25/each

*Rebates available for both new construction and retrofit installations.

** Water heating must be provided by natural gas.
