

UTAH

ThermWise® Custom Business Rebates
Simplified Analysis – Post-Installation Report (POR) Application

If you conserve, you can save.®

Application Instructions

IMPORTANT: Please read this application carefully. It is the applicant's responsibility to complete the application and submit it with the required supporting documentation. Rebates are only available for Questar Gas® General Service (GS) business customers in the Utah service territory.

- 1. Review Program Manual
2. Complete all the information requested on this Post-Installation Report (POR) Application.
3. Include a copy of your most recent Questar Gas monthly bill.
4. Include supporting cost documentation, in the form of invoices, that includes the following information:
- Retailer/Contractor name, address and phone number
- Itemized listing of quantity, size, description, manufacturer, model number and other identifying information as appropriate
- Invoice date and cost
- Efficiency requirements documentation
5. Submit the completed signed application with all supporting documentation to the address or email below.

# Incentive Application: Boiler Control Installations

## Overview and Eligibility

Installation must occur after a boiler tune up. Proof of this will be demonstrated by the submittal of the ThermWise Business Rebate Gas Boiler Tune-Up Application Supplement from Questar Gas or other documentation demonstrating a boiler tune-up occurred within the previous year. Only boilers that exclusively feed the facility's HVAC systems shall qualify for a streamlined rebate. Each boiler has safety temperature limits, normally defined as high and low, determined by the manufacturer (safety high and low limits). These limits protect the boiler from a number of hazards that may occur over time if the supply or return temperature is lower than required. It is required that these values be submitted as part of this process. To be eligible for the Custom Business Rebates program, the boiler control measure must be installed on an existing boiler. To realize continued savings, annual boiler control tune-ups are recommended post-installation.

Project Details				
Pre-Installation Supply Temperature Setpoint (°F):		What is the Function of the Boiler? (circle one):	Space Heat	Process Load
Pre-Installation Firing Temperature (°F):			Domestic Hot Water	
Safety High Limit (°F):		Boiler Size (kBtu/hr Input):		
Safety Low Limit (°F):		Questar Gas Meter Number Attached to Boiler:		
Date of Boiler Tune Up:				

After Installation			
Please fill in the HVAC system details using information from the mechanical schedules:
